Product Focus

Gripple Automation's unique wire rope collection unit. The Kick Out Tray works in unison with the Wire Rope Annealing Machine and DeReeler.

Our dereeling and fusing technologies are constantly communicating to ensure your product is measured, cut and collected for use within your application.

Key

- 1 Ease of access to key components via our linear sliding access cover
- 2 Wire guide - allows for seamless connection from the Wire Rope Annealing Machine
- 3 Configurable with upstream machines - Works in collaboration with the HMI found on the Wire Rope Annealing Machine
- 4 Pneumatic connection, 6 bar pressure
- 5 Drive unit - the overriding component taking the fused wire, and mechanically driving it down the Kick Out Tray drop channel.
- 6 Safety detection plate
- 7 Emergency stop
- 8 Fully extendable in 2.5m modules

Kick Out Tray

**Contact us today
to learn more!**

Are you a manufacturer in need of a reliable and efficient way to collect cut wire from your automated machines?

Gripple Automation's Kick Out Tray is a wire rope collection unit that works seamlessly with our Wire Rope Annealing Machine and DeReeler. It's the perfect solution for ensuring a smooth and streamlined operation, eliminating the need for manual wire handling and reducing the risk of tangling or damage.

Key Features

- **Adjustable size** - Fully extendable in 2.5 m modules
- **Operator friendly** - Works in collaboration with the HMI found on the Fuser
- **Safe and Easily accessible** - Ease of access to key components via our linear sliding access cover

Designed for maximum flexibility, our Kick Out Tray is fully extendable to meet your specific needs

With the Kick Out Trays easy-to-use interface and low maintenance requirements, it's a cost-effective solution for your wire handling needs.

Why waste time and resources on manual wire handling? Choose Gripple Automation's Kick Out Tray for a more efficient and streamlined solution.

** Please note: This machine can only be used in collaboration with the Gripple Automation Wire Rope Annealing Machine*

Quality Guarantee

All our machines are developed and manufactured in-house at our site in Sheffield, England.

Gripple Automation is a 100% employee owned company, meaning all our people own shares in the business.

Giving all our people direct responsibility and encouraging active participation across every area of the business ensures we're empowering everyone to drive improvements, and ultimately, the business' success directly affects us all.

Having engaged owners across every department of the business gives a commitment to the quality of our product and service offering that our competitors simply can't match.

We're all working towards the same targets, and we all benefit when we meet them, so the focus on maintaining high standards is consistent at all levels.

The DeReelers are built for durability and are the result of continuously developing our products for our parent company Gripple Ltd who process 58 Million meters of wire through our machines every year.

The key role we play in developing machines for Gripple means we constantly strive to innovate and deliver efficient solutions to our customers. Our design together with our understanding of the needs of a wire solutions manufacturer gives these machines an edge you won't find with competitors.

Get to know our engineers

At Gripple Automation, our team of highly trained engineers have a unique blend of skills and experience that have been instrumental in the development of our wire rope machines.

Our teams hands-on experience enable us to create innovative solutions that meet the needs of our customers.

Thanks to our teams expertise and dedication, our wire rope machines are second to none. From our Wire Rope Annealing Machine to our Enhanced and XL DeReelers, each product is designed with efficiency, reliability, and ease of use in mind. And with the teams ongoing involvement in our product development, you can trust that Gripple Automation will continue to lead the way in the wire industry for years to come.

It's in all our best interests to keep striving, delivering, and improving

Key Recommendations

Failure to comply with these recommendations may result in product malfunction and possible damage to property or person and will invalidate the Gripple Automation guarantee. Gripple Automation machines are guaranteed to be free from defects in materials and workmanship in accordance with our terms and conditions.

No other warranty, whether express or implied, including any warranty of merchantability or fitness for purpose shall exist in connection with the sale or use of any Gripple Automation machine.

These Key Recommendations may be amended from time to time; please contact one of your team at sales@grippleautomation.com for more information.

Please adhere to the following usage recommendations:

Loading

To keep the machine running at optimal efficiencies, you must ensure it is used correctly, in conjunction with other machines from our Wire Rope Range. By following this recommendation and preventative maintenance, the machine will achieve reliable output and minimal downtime.

Storing

Do not store the machine outdoors, or in damp or abnormal conditions.

Repair, Modification and Re-use

Do not repair, modify or re-use Gripple Automation machines. If you have any queries regarding product performance, please contact info@grippleautomation.com

Gripple Automation's policy is one of continuous development and innovation. We therefore reserve the right to alter specifications without notice.
